AD Off – Vinyl Adhesive Remover

TECHNICAL DATA SHEET

BENEFITS

- Highly effective
- Water clean up
- Effective for removing wide range of labels and adhesives
- Water or solvent clean up

GENERAL INFORMATION

Effective formulation – safe on most painted surfaces and most substrates when used as directed.

DIRECTIONS

Add quantity to trigger sprayer bottle. Return unused portion to metal can after use.

Spot test on surface to be cleaned before using. Warm the graphic/decals with a commercial grade heat gun. Ensure that the graphic/decals is not too hot, otherwise it will leave excess residue on the surface and may also damage the surface. Once an area is warmed, start to peel at one end. Do Not use a razor blade or sharp object to aid in removing graphic/decals. After graphic/decals has been removed spray a generous amount of AD OFF on areas where adhesive residue is present. After 30 – 60 seconds, use a hard plastic squeegee to remove the majority of the adhesive residue. Spray area again and wipe with a soft cloth or paper towel to remove any remaining residue. One residue is removed, rinse with soap and water.

TECHNICAL DATA

Odour: Citrus
pH: Not applicable
Viscosity: Thixotropic

AD OFF is available in these sizes:

Part # 77401 6 x 535 mL
Part # 77404 4 x 4 L jug
Part # 77420 1 X 20 litre pail
