CONCRETE FORM RELEASE

(A Mineral Oil Based Reactive Form Release)

Lloyds' multi-reactive form release is composed of an organic chemical that reacts with the alkali content of concrete to form a release film that effectively inhibits the bonding of the concrete to the form. In addition, the product also contains a high molecular weight, non-reactive, chemically inert ingredient to assist in clean, quick form release and removal. These exclusive ingredients combine the effectiveness of a chemically reactive type and an inert barrier type to provide a doubly effective separation.

BENEFITS

- WHMIS 2015 / OSHA Non Controlled
- Will not freeze
- Works on trucks, pavers, rollers, tools, spreader bars, belts and conveyors as well as all types of forms.
- Saves clean-up time

GENERAL INFORMATION

Concrete release agent is very easy to use – use as is. Spray equipment thoroughly with product Agitate solution before and several times during use Provides a better and cleaner cast when applied on pre-stressed and precast concrete forms. Cuts stripping time to an absolute minimum. Reduces form cleaning and repairing. Increases wood form life ... prevents rust ... and rustproofs metal forms. Prevents bonding between poured concrete and the form. Breaks concrete bond between the surface and the form cleanly and effectively ... leaves smooth surface. Will not stain or discolor concrete and can be painted over. VOC compliant.

TECHNICAL DATA

Odour:	Slight
pH:	Not applicable
Solubility in water:	Insoluble
Solubility in mineral spirits:	Soluble
Flash Point:	>93.3°C (200°F)
Storage (at 21°C /70°F):	1 year
COVERAGE	600 - 1500 ft.2/gal. (14.7 - 36.8 m2/L), depending on type and porosity of the form surface.

Concrete Form Release (Mineral Oil Based) is available in these sizes:

Part # 86020	20 L pail
Part # 86045	205 L drum
