Red Heavy Duty Lithium Complex Grease #2

TECHNICAL DATA SHEET

BENEFITS

- Water resistance
- Resists separation and thinning
- EP additives
- Rust and anti corrosion additives
- Hold or cold environment

GENERAL INFORMATION

Specialized lubricant for extremely demanding applications of low to high temperatures. Ultimate in quality lubricants for demanding applications. Excellent water resistance, storage stability, high load carrying capacity, excellent resistance to oxidation and corrosion.

COMPOSITION

Homogenous blend of highly refined base oils, thickened to a smooth consistency and fortified with rust inhibitors, antioxidants, adhesive and cohesive additives and anti-wear agents.

TECHNICAL SPECIFICATIONS

NLG1 Grade:	#2
Dropping Point °F:	500°
Viscosity Index:	85
Colour:	Red
Pour Point °F:	0°
Core Penetration:	265 - 295
Temperature:	to 500°F
Thickener:	Lithium complex
Appearance:	Red, smooth

Red Heavy Duty Lithium Complex Grease #2 is available in these sizes:

Part # 66701 10 x 400 gram cartridge

Proudly  Canadian
